

# John Adib

v27.0.0

Engineering Manager · 2x Founder · Former CTO · AI & Cloud

+44 7393 633 145 · London · UK Settled Status

MrAdib.com · [github.com/JohnAdib](https://github.com/JohnAdib) · [linkedin.com/in/MrAdib](https://linkedin.com/in/MrAdib) · [mr.john.adib@gmail.com](mailto:mr.john.adib@gmail.com)

Engineering leader with deep technical expertise and 17+ years building and scaling products, teams, and platforms. Co-founded a product that reached 1M users in 30 days. Architects and operates production AI/ML systems and embeds agentic AI into engineering workflows. Leads teams with end-to-end ownership of delivery, impact, and reliability. UK Global Talent endorsed and tech conference speaker.

## Experience

### Engineering Manager, Consumer

(5 months) **Apr 2026 - Present**

*Zapp · Series B B2C quick-commerce company with £100M+ annual revenue and \$300M+ raised*

*Full-time · London*

- Shipped post-checkout Additional Items feature, driving +23% revenue on amended orders.
- Engineered an 8-skill AI coding suite carrying a ticket to a reviewed PR with screenshot and video evidence, adopted org-wide.
- Accelerated iOS and Android release cadence from monthly to weekly, shipping 10+ versions.
- Introduced Maestro end-to-end testing in CI with smoke and nightly runs, growing coverage steadily from zero.
- Led the biggest SEV1 in company history, then built the company-wide incident function, severity framework, and SOP.
- Authored the levelling and pay bands for the entire engineering job family.

**Tech Stack:** TypeScript, Node.js, Python, React, React Native, Expo, EAS, Unistyles, Tamagui, Next.js, GCP, Cloud Run, Pub/Sub, Firestore, Terraform, GitHub Actions, Turborepo, incident.io, Sentry, Statsig, Mixpanel, Adyen, Maestro, Playwright, Vitest, Storybook, Chromatic, GraphQL, Django, Algolia

### Senior Software Engineer, Operations

(1 year 5 months) **Dec 2024 - Apr 2026**

*Zapp*

*Full-time · London*

- Developed a reusable design system with 90 tested components, integrated into 5 services in production.
- Launched an enterprise auth panel with passkeys and 10+ RBAC roles in 3 days with AI, edge-deployed to 3 envs.
- Migrated CI/CD from CircleCI to GitHub Actions, achieving instant, 100% reliable deployments and 80% faster deploys.
- Boosted platform performance with 60% faster load times across all pages and 80% better homepage LCP.
- Established E2E tests covering 100% sensitive flows in CI/CD, reducing validation time and boosting release confidence.

**Tech Stack:** TypeScript, Node.js, GCP, Pub/Sub, CircleCI, Algolia, GitHub Actions, Material UI, Firebase, Firestore, Next.js, React.js, Playwright, NestJS, Terraform, Vitest, Jest, Chromatic

### Senior Lead Software Engineer

(2 years 1 month) **Dec 2022 - Dec 2024**

*Loopla · B2C/B2B family events marketplace and booking SaaS platform*

*Full-time · London*

- Led development of a booking platform with 10+ distinct designs and drove OKRs to establish a new revenue stream.
- Automated deployment process with CI/CD, cut time from months to less than 10 minutes and ensured zero downtime.
- Refactored E2E tests and designed 35+ Cypress tests, enhanced pipeline efficiency, performance and reliability.
- Architected a pixel-perfect UI with Atomic Design, utilized Storybook with 1,000+ tests for high quality and scalability.

**Tech Stack:** TypeScript, Node.js, GCP, Docker, Terraform, PHP, GitHub Actions, PostgreSQL, MongoDB, Prisma, React.js, Tailwind, Next.js, Express, Vue.js, Jest, Cypress, Playwright, Storybook, Chromatic

### Co-Founder & CTO

(3 years) **Dec 2019 - Nov 2022**

*Jibres · B2B2C omnichannel e-commerce SaaS platform managing 132K+ products across web, mobile and POS*

*Full-time*

- Scaled an integrated cloud eCommerce platform (web, app, POS, CRM, accounting) to 1,200+ businesses.
- Launched an automated app factory that generated a native Android shopping app without coding in less than 10 minutes.
- Hardened security with WAF filtering and monitoring, blocking 99% of attacks, and ran a public bug-bounty program.

### Head of Engineering

(1 year 5 months) **Aug 2018 - Dec 2019**

*Ermile · B2B EdTech SaaS platform serving 500K+ students and 2K+ teachers*

*Full-time*

- Led engineering team that delivered educational management system serving 500,000+ students and 2,000+ teachers.
- Designed the database from scratch and built 150+ SPA functional modules with server-side rendering.

### Principal Software Engineer

(1 year) **Sep 2017 - Aug 2018**

*Tejarak · B2B SaaS startup for workforce attendance and time tracking*

*Full-time*

- Delivered an NFC-powered attendance system with interactive display and mobile check-ins, launched MVP in 2 months.

Co-Founder & CEO

Sarshomar · B2B2C SaaS survey platform reaching 1M+ users/month and collecting 2M+ responses

Built and led a 15-member cross-functional startup, launched a flagship product that rapidly scaled to 1M users in month one.

(2 years 4 months)

Jun 2015 - Sep 2017

Full-time

Computer Lecturer

Teacher

Taught 2,000+ students web technologies and ICDL across 4 universities, vocational colleges, and private classes.

(11 years 4 months)

Jun 2006 - Sep 2017

Part-time

Software Engineer

Mixa · B2B2C cloud document management and archiving system

Established a cloud archive solution that annually saves 1M+ documents and avoids waste of tons of paper.

(3 years 11 months)

Aug 2011 - Jun 2015

Full-time

Frontend Developer UI/UX

Freelancer

Designed and deployed 40+ WordPress websites, improved user experience, and achieved a high SEO rank.

(3 years)

Sep 2008 - Aug 2011

## Personal AI & ML Engineering Projects

- Automated a marketing pipeline that publishes 12 posts a day across 4 platforms, now an acquisition channel.
- Shipped 200,000+ live pages across 12 languages, each with an auto-rendered localised preview image.
- Eliminated hallucinated content by gating every AI proposal behind 8 automated verification stages and human approval.
- Reframed 40,000+ video clips to vertical automatically, replacing manual editing with GPU active-speaker tracking.
- Cut inference cost ~6x by routing each workload to the smallest capable model, holding spend flat as generation scaled.
- Authored a full curriculum with an agent fleet, gated by 58 deterministic rules and a 6-pass AI-judge audit.
- Built a Bayesian adaptive assessment engine placing a user in 12 questions, simulation-validated across every band.

**Tech Stack:** Gemini, OpenAI, Ollama, ElevenLabs, MCP, PyTorch, CUDA, YOLO-pose, InsightFace, ONNX Runtime, MediaPipe, OpenCV, ffmpeg/NVENC, Remotion, sharp, Python, TypeScript, Node.js, Hono, Drizzle, Next.js, Expo, React Native, Swift, Kotlin, Turborepo

## Skills

|                          |                                                                                                                                              |
|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------|
| Leadership               | Hiring, Coaching, Incident Management, OKRs, Levelling, Roadmaps, Prioritization, Stakeholder Management, Cross-functional Collaboration.    |
| AI Engineering           | LLM orchestration, agent orchestration, multi-step state management, prompt engineering, structured outputs, agentic pipelines, MCP.         |
| RAG & Evaluation         | RAG, embeddings, vector similarity search, pgvector, chunking strategies, LLM-as-judge, eval harnesses, hallucination gating.                |
| AI Infrastructure        | Gemini, OpenAI, Claude, Ollama, multi-provider failover, cost-tiered routing, rate-limit budgeting, GPU/CUDA inference, ElevenLabs TTS.      |
| Machine Learning         | YOLO pose, ArcFace face embeddings, MediaPipe, ONNX Runtime, OpenCV, active-speaker detection, Bayesian adaptive testing, spaced repetition. |
| Tech Stack               | TypeScript, Node.js, Python, Bash.                                                                                                           |
| API                      | REST, GraphQL, WebSocket, tRPC.                                                                                                              |
| Web Framework            | Express.js, NestJS, Fastify, Hono, Next.js.                                                                                                  |
| Front-end JS Library     | Vanilla JS, Vue.js, React.js.                                                                                                                |
| Mobile                   | React Native, Expo, EAS, OTA, Sentry, Mixpanel, AppsFlyer.                                                                                   |
| CSS Framework            | Tailwind CSS, Shadcn, Bootstrap, Material UI.                                                                                                |
| Test Suites              | Cypress, Playwright, Storybook, Jest, Maestro, Vitest.                                                                                       |
| Infra                    | Terraform, Cloud Run, Kubernetes, Firebase, Edge, AWS, GCP.                                                                                  |
| Database                 | MySQL, PostgreSQL, MongoDB, Firestore.                                                                                                       |
| ORM                      | Prisma, TypeORM, Drizzle, Mongoose.                                                                                                          |
| Distributed Cache        | Redis, Memcached.                                                                                                                            |
| CI/CD Automation         | Docker, GH Actions, Turborepo, Monorepo.                                                                                                     |
| Messaging and Monitoring | RabbitMQ, Elasticsearch, Pub/Sub.                                                                                                            |
| Engineering Principles   | SoC, SOLID, OOP, TDD, DRY, EDA.                                                                                                              |
| Core Web Essentials      | HTML, CSS, JavaScript, Crawl, SEO.                                                                                                           |

Volunteer work

|                                                                                                                                                                                                                                                                                                                                                                                     |                                                |
